New High Tech Grade

K88UF

The new high tech grade K88UF closes the gap between our premium grades K55SF and K44UF. K88UF displays a hardness HV 30 of around 1800 at an adequate toughness, using 0.5 μm sub-micron size WC-powder in combination with a Cobalt content of 10 wt %. Thus K88UF is specially designed for high speed milling applications in hard and difficult materials.

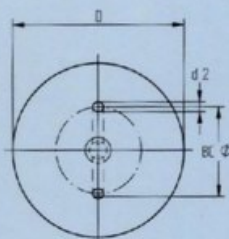

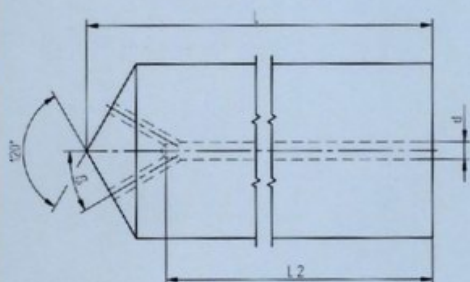

**MADE IN
GERMANY**

SPECIAL PRODUCTS

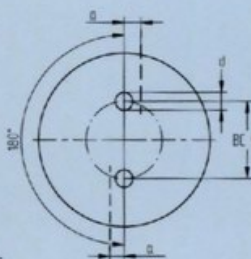

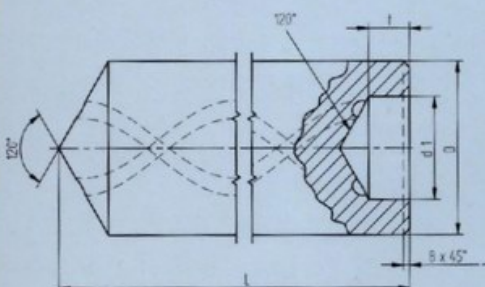

Ground rods and blanks for special tools

We can also supply you with ground rods (h6), pre-fluted rods, cut to length and with stepped diameters.

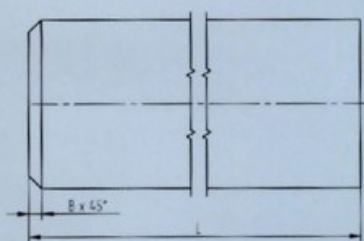

EXAMPLES

Rods with 1-in-2(Y) exit ducts - 120° tip style
